The diagram illustrates variable scopes. It shows three nested scopes: Scope 1, Scope 2, and Scope 0. Scope 1 contains the declaration 'a| int' and the label 'Scope 1'. Scope 2 contains the label 'Scope 2'. Arrows from both Scope 1 and Scope 2 point to Scope 0, which contains the declarations 'b| string' and 'a| int'.

Now let's make it more complicated by

- adding another string
- changing the value of an existing string.

Rewind to just before the closing brace.
