Department of Computing Technology Goals

1. Prepare students for a career in a technology field or for graduate study in a technology field.

2. Provide students with both theoretical knowledge as well as skills-based proficiencies in five core technology competencies:
   a. Programming
   b. Hardware
   c. Data Communications
   d. Data Management
   e. Systems / Software Analysis and Design

3. Provide students with fundamental knowledge of business administration and management so that graduates will be able to work effectively within businesses and organizations.

4. Develop interpersonal skills for working effectively on teams.

5. Develop effective written and oral communication skills.

6. Educate students about the behavioral, social, and ethical aspects of technology.

Note from Alan
These goals are cross-referenced to syllabi for each class that I teach and referenced in my course policies.
