

Technology Entrepreneurship

ITS 440 • Fall 2010

-Startup Advice

Goals

The goal is to research and collect advice from successful entrepreneurs so that we may record this wisdom in a manner that's easily retrievable.

Instructions

You will be assigned a number of episodes of *This Week in Startups* to watch. Each episode is like tranya, and I hope you relish it as much as I. Enjoy them, revel in them, and take notes on the plethora of entrepreneurial advice given in each.

Prepare a list of issues and advice for each episode. And by list, I mean a valid HTML5 unordered list. For example:

```
<ul>
  <li>
    <strong>Issue</strong>:
    How can I be sure that Alan won't throw me out of class?
    <br>
    <strong>Advice</strong>:
    Stay focused and never, ever, under any circumstances, goof
    off with your e-mail, Facebook, or anything else. He hates that.
  </li>
  <li>
    <strong>Issue</strong>:
    What do I do if I cannot program in JavaScript?
    <br>
    <strong>Advice</strong>:
    Change majors.
  </li>
</ul>
```

E-mail your completed list for each episode to Alan.
