Introduction to Programming

CMPT 120 · Fall 2014

–Project 1 - Your First Web Page - 60 points

Goals	To become familiar with introductory HTML, CSS, and JavaScript To practice HTML5 validation
Instructions	Create your own web page with the following features:

☐ The filename should be index.html [5 points]

☐ Your page must validate as valid HTML5 according to [25 points]
http://validator.w3.org. (See line 18 in the example code
for a useful link to include on all your pages.)

☐ In comments near the top: Your full name, the date, the [5 points]
assignment name (See lines 3 - 5 in the example code.)

☐ Body contents: [25 points]

‣ Your name - try it with different styles. (See lines 11 and 17.)
‣ Our class name - in a different style than your name.
‣ A mailto: link to send you e-mail
‣ Favorite quote from a James Bond film before 2006.
‣ A list of movies you like using (`<ol>` or `<ul>`) and `<li>` elements.

Submitting	

1. E-mail your index.html file to alan@labouseur.com **before** the class in which the
   assignment is due. (See syllabus for due dates.)
2. **Print** and staple your source code **before class** and hand it in at the **start** of the
   class in which it is due. Remember to include your name, the date, and the
   assignment in comments near the beginning of your code.

Example

```
1   <!DOCTYPE HTML>
2   <html>
3   <!-- Alan G. Labouseur
4       Introduction to Programming
5       Project 1 - My First Web Page -->
6   <head>
7      <meta http-equiv="Content-Type" content="text/html;charset=utf-8" />
8      <meta name="author"          content="Chris D. Student" />
9      <title>My First Web Page</title>
10     <style>
11         .footer {font-style: italic;}
12     </style>
13  </head>
14  <body>
15     Now is the time for all good students to come to the aid of their web page.
16     <br>
17     <p class="footer">
18        <a href="http://validator.w3.org/#validate_by_input">Validate as HTML5</a>
19     </p>
20  </body>
21  </html>
```
