Homework 2

Goals	To improve on your existing essay presentation by enhancing it with HTML5's semantic tags, external style sheets, and table and form elements.
Instructions	1. Style Sheet - *15 points* • Develop one style sheet for use in all your homework documents. 2. Home Page - *10 points* • Improve the look and feel of your home page with the use of tables and styles. • Replace generic tags to HTML5 semantic tags (nav, article, etc.) 3. Modify your Homework 1 Essay - *10 points* • Style the page with CSS ‣ Background colors and graphics ‣ Text presentation and position ‣ Link presentation (colors) • Put the table of contents in a table • Replace generic tags to HTML5 semantic tags 4. Essay Feedback Form - *15 points* • Develop a "feedback" form page, linked from your essay, after the references section, which presents the user with the ability to enter the following (feel free to add to this list): ‣ User Name – text ‣ Password – password ‣ General Comments – textarea ‣ Thing you most liked – (four choices, **pick one**, radio buttons) ‣ Things you didn't like – (four choices, **pick as many as you like**, checkboxes) ‣ Rating from 1 to 10 – range control ‣ Submit button - submit ‣ Clear button – reset • Like the rest of your work, this page should make excellent use of external style sheets, presenting the data in a clear, concise, professional (and creative) manner.
Submitting	Upload your entire site to your directory on my server via FTP as we discussed (several times now) and practiced in class.
